# **MARCH 2024 Wellness Menu**

Monday Tuesday Wednesday Thursday Friday Saturday Sunday

Kristi Friesen, RDN at Project Open Hand

## March is National Nutrition Month

This year's theme for National Nutrition Month inspires us to look Beyond the Table when thinking about our health and the environment. Choices we make daily, including what we're going to eat and drink, can make a big difference – both now and in the future.

#### **Beyond the Table**

Healthy choices go beyond the foods and drinks we enjoy while sitting at the lunch or dinner table. They include our snacks, breakfast on the go, eating out with friends, and even where foods are grown and how they're prepared.

Our food choices also can affect the health of our planet. Have you ever thought about the work that goes into producing the foods we eat? This includes how food is grown or raised, where and how it is made, as well as its safety. It's important to think about the foods we eat and the nutrition they provide, but is there more we could be doing to improve our health and the environment?

### Here's a few tips to help you reach Beyond the Table:

Focus on a healthy eating routine. Making healthy food choices may seem difficult at times, especially when eating away from home, but it doesn't have to be. Many eating places provide nutrition information right on the menu or online to help you choose healthier options. When purchasing food from a store, use a grocery list and pay attention to sales. You can also learn about resources in your community that offer access to healthy foods, such as food banks.

**Seek the help of a Registered Dietitian Nutritionist (RDN).** Registered dietitian nutritionists, also known as RDNs, are food and nutrition experts who help people live healthier lives. RDNs can help you explore ways *Beyond the Table* to reach your health goals. Make an appointment with an RDN who specializes in your specific needs to jumpstart your plan for personal wellness.

**Learn what's involved in growing your food.** There are many ways you can learn about how your food is produced. Visit a local farm or farmers market and talk with the people who are growing and harvesting your food. Many farmers and food producers will be happy to answer your questions, let you sample products, or provide recipes for foods that are new to you. Some local farms even have tours, so people can see how they operate.

You can also grow your own fruits and vegetables at home. Want to try gardening but have limited space? Grow herbs or lettuce indoors. Tomatoes, peppers, or strawberries may work too, if you have a patio or area with enough sunlight. Look for community gardens in your area where you can participate in the growing process and share in the harvest.
